

Internet & Data Applications

DIA (DIRECT INTERNET ACCESS) - XDSL TO 10 GBPS
Leveraging Internet and Web-Based Technologies

Now available on all ILEC, IXC, ISP, CLEC and Cable Networks

SERVICE OVERVIEW

WCS offers an expanding portfolio of IP-based products and services that enable customers to enhance their business capabilities. Our multi-protocol label switching (MPLS)-enabled OC-48 IP network is expertly engineered and managed to provide industry-leading network reliability and quality.

We offer a variety of bandwidth increments, access methods and billing options that can be customized for solutions to meet customers' unique needs. With a large U.S. infrastructure and increasing reach to international locations, connectivity to all major Internet providers, and a presence at U.S. peering exchanges, our Dedicated Internet Access consistently delivers the Internet to customers, helping them offer local-to-global connectivity to their end users.

WCS's IP network successfully blends efficient Tier 1 connectivity, dense wavelength division multiplexing (DWDM) and MPLS to deliver a superior network solution with quality IP service and security. The engineering and performance strength of our backbone network enables us to provide industry-leading service level agreements (SLAs) with credits for network availability, packet loss and latency.

Our IP backbone excels against the competition in network performance and affordability.

Let WCS Help You Manage Your Entire Network!
